

The infrastructure layer of EU Digital Product Passports

What is **ORIGYN** ?

The **most advanced platform** for digital product passport implementation.
ORIGYN turns EU DPP compliance from a multi year engineering project into a plug & play rollout,
with every passport tamper proof, traceable and always available.

Physical - Digital Bridge

Every unique passport links to a physical product
via QR or NFC full data, images, documents,
materials & provenance revealed on scan.

Listed on dppindex.eu
as an official EU DPP Provider.

Customized Infrastructure

No single point of failure. Choose Swiss, global
or your own servers. ESPR compliant and audit
ready by design.

Trusted alongside Siemens,
DNV, Avery Dennison,

The deadline is now. **February 2027** is approaching.

Why **ORIGYN** ?

Deploy in weeks, not 18-36 months :
Meet the 2027 deadline with time to spare.

Plug & Play :
Assess, configure & ready to rollout in days.

We maintain & upgrade it :
You stay compliant as ESPR schemas evolve.

Higher savings :
A competitive price point versus competi-
tion or building your own.

How we implement your DPP ? The **ORIGYN** partner model.

01

Assess

Map your catalog to
ESPR categories &
timelines.

02

Create

Generate DPPs per
product, matched to
your data model.

03

Connect

Tag products
(QR/NFC). DPPs go
live & verifiable.

04

Comply & Grow

Requirements met.
Extend to anti-coun-
terfeiting & resale.
